

# Connect the Dots

Connect the dots to reveal the Mute Swan. Then, give it some color. (Psst! Be creative.)

**Mute Swans may be white, but yours does not have to be!**

Mute swans are the heaviest of all waterfowl, weighing a whopping 50 pounds! They are native to Europe, but were introduced to the United States during the time of the 13 colonies. Despite their name, these swans are not mute. They can make a raspy grunt. It is not very loud, so it can be difficult to hear from a distance.
